# Compliance Declaration Infrastructure

Identify your EU AI Act obligations. Document. Seal.

Your AI deployment is ready — blocked by regulatory obligations.

- Your internal AI projects multiply use cases, but every deployment hits a procurement questionnaire or a governance requirement.

- Legal and compliance teams require an auditable trail: inventory, declarations, evidence — not a simple Google Doc.

- Art. 4 and 5 have applied since February 2025 — over a year ago. Without an AI literacy policy and Art. 5 declaration, your existing deployments are already exposed.
Art. 50 + high-risk regime: August 2026.

HIGH-RISK CLASSIFICATION

EU AI ACT — ART. 4 · 5 · 50

BLOCKED AI DEPLOYMENT

DATA GOVERNANCE STANDARDS

TRANSPARENCY AUDIT

Your current documentation doesn't pass the procurement filter. This creates cost and delays.

EU AI Act Timeline — where do we stand?

⚠ **ALREADY IN FORCE**

IN 5 MONTHS

NICHE

Art. 4 — AI Literacy
Policy + training traceability

Art. 5 — Prohibited Practices
Signed declaration of non-use

Art. 50 — Transparency
Chatbots, AI-generated content, deepfakes

High-risk regime (Art. 6+Annex III)
HR, credit, biometrics, justice

Art. 6(1) — Safety Components

AI embedded in regulated physical products (MDR, Machinery)

Veroberg covers Art. 4, 5 and 50 at launch. If you have AI systems in production without documentation: the time to document is now.

A verifiable AI dossier in under an hour.

Meet procurement and compliance requirements with cryptographic infrastructure — not a Word file, nor an LLM copy-paste

Publish in < 1 hour

Document the AI posture of each system or use case.

Cryptographic sealing

Every declaration is hashed and signed (Ed25519) — immutable proof of integrity.

Verifiable

A pack (PDF + JSON) that your internal buyers or auditors verify via QR code — no account needed.

Qualification Engine — deterministic, not probabilistic

Provider/deployer role tag, risk flag, usage category

Result: a targeted, sealed, verifiable Procurement Pack — designed exactly for your obligations.

Not a generic template. Your words. Your dossier. Sealed by Veroberg.

The mechanics of trust.

Declare:
Your AI teams follow a guided process for articles 4, 5 and 50.

Document:
Attach existing evidence:
URLs, internal policies, reports.

Seal:
Automatic Seal Receipt (SHA-256 chain), append-only and tamper-detectable.

Export:
Procurement Pack in one click:
Signed PDF, manifest.json, QR.

Verify:
Procurement, legal, or auditors
validate integrity instantly.

VERIFY A PACK

Verify the integrity of a Veroberg document

Enter the verification token from your PDF.

Paste the token or pack ID | **Verify**

Can't find the token? It's printed at the bottom of your PDF, or scan the QR code on the last page.

We don't scan your infrastructure.
We seal what you declare.

Criteria	Enterprise GRC Solutions	Veroberg
Model	Heavy automation	**Sealed self-declaration**
Required integrations	AWS, GitHub, Okta	**None**
Target	Dedicated security team	**AI teams without GRC**
Deployment time	Weeks	**< 1 day**
For large enterprises	Live dashboard, no exportable sealed pack	**Pack verifiable by your internal procurement**

We don't certify compliance. We seal your posture — verifiable for 24 months, even after cancellation. A single recovered procurement cycle covers several years of a Business subscription.

Designed to integrate into your processes, not bypass them.

Standard: €1,350 excl. tax / year
Up to 1 product workspace, unlimited contributor users.

Business: €2,520 excl. tax / year
Up to 5 workspaces (one per AI product, BU or regulated market).

Enterprise: Order Form
Unlimited workspaces, 10-year retention, full DPA, EU GDPR.

Enterprise Pilot: €500 excl. tax

Your first Procurement Pack built in concierge mode — delivered in 5 business days, tested on a real active dossier.

Refunded if it doesn't reduce back-and-forth.

Your first verifiable AI dossier before your next internal review.

Stop losing HR cycles on procurement
questionnaires with no structured answer.
Have a professional, sealed, verifiable response —
ready to send.
